

STUDIO

Organise your Creativity

What is V-Studio?

V-Studio is the new suite of programs for Valiani machines, developed to optimise the use of all our computerized mat cutters.

An innovative menu allows you to reach specific applications designed to create projects with absolute simplicity.

Creating original matboards in quicker times, personalising your boxes and achieving contour cuts from today will be simpler thanks to an ideal design environment, equipped with extraordinary tools.

Totally configurable via the settings menu, it allows the user the freedom to create a unique configuration, adapting the program to your requirements and not vice versa. Written using the latest generation of software tools, including the Microsoft.Net® platform and developed using WPF® (Window Presentation Foundation) technology it guarantees perfect integration with even the latest operating systems and those of the future.

What has improved?

Design and create content for various types of work in a complete creative ambience, with an attractive look and with all the tools that you had always wished for.

Thanks to a pleasing layout, clean and harmonious, the new functionality results in easy access and is rationally positioned to optimize the creative workflow. A large preview, positioned in the centre of the screen, allows a clearer visualisation of what will be the final project.

Which applications make V-Studio so special?

Create

Discover new ways to create mat boards with full creational freedom and with the maximum of ease, utilizing avant-garde tools. Work quickly and intuitively thanks to an approach coherent with the user interface in all its components.

Easy Box

Increase your productivity, using the exceptional functionality of the new application for editing packaging. Utilise the new, purposely developed, functionality to improve integration with the M3 application and increase its productivity.

Image Cut

Reach new levels with the functionality to perform contour cut shapes. Use the crop mark detection function to accurately cut preprinted designs.

Smart Cut

Use the most common vector graphic programs to transfer your projects to Valiani machines.

Whats New?

With **V-Studio** we decided to re-evaluate everything and have introduced new functions that will make you look at using your Valiani machine in a totally new way.

Innovative Guide Lines

'Auto size' function

Weld, intersect & trim functions.
